Summary

B.Tech CSE student with a 9.7 CGPA who enjoys solving problems in C++ and building web apps. Hackathon runner-up and team leader, looking for a software development internship.

Education

B.Tech, Computer Science Engineering | NxtWave Institute of Advanced Technologies (Yenepoya School of Engineering and Technology) | Expected 2029

- CGPA: 9.7 (current, 3rd Semester)
- Class XII: 89% | Class X: 84%

Projects

ScanOnce: Retail POS and Inventory Management System | React, Node.js, Express, Supabase (PostgreSQL), Tailwind CSS | github.com/VINE-droid/scan-once-business

- Led a team of 3 at the TakeOver'26 Hackathon to build a billing and inventory system for small shops.
- Planned the work and split tasks across the team; designed the database tables and connected the backend to Supabase.
- Features include automatic barcode generation, a mobile camera scanner for checkout, stock receiving with low-stock alerts, invoice generation, and a credit ledger for customers who pay later.

Recipe Substitution App | React, Node.js, Express, PostgreSQL, Prisma, Gemini API | github.com/VINE-droid/recipe-substitution-app

- Built an app that finds recipes from the ingredients a user already has, with vegetarian, vegan, gluten-free and dairy-free filters.
- Clicking any ingredient asks the Gemini API for diet-friendly substitutes.
- Cached recipe details in the database to avoid hitting Spoonacular's API limits, and stored search and substitution history.

Achievements

- **Second place**, Build to Ship Hackathon (September 2026), college-level, 5-member team. Team leader and main planner.
- Selected in the college-level round of Smart India Hackathon (SIH) 2025.

Technical Skills

- **Languages:** C++ (proficient), Python, JavaScript, SQL
- **Web:** React, Node.js, Express, HTML, CSS, Tailwind CSS
- **Databases and tools:** PostgreSQL, Supabase, Prisma, Git, GitHub

Spoken Languages: English (B2) ,Hindi(Speak and Write)
